EDUCATION

California State University Chico

Master of Science in **Data Science and Analytics**

Activities: 3x Startup Challenge Winner, NVIDIA Hackathon, Stanford Hackathon, LA Hacks.

California Chico, USA

2024 – 2026

WORK EXPERIENCE

ZOL [Backed by KOINZ CAPITAL]

Designation: Co-founder & CTO

Chico CA, USA

2025 - Present

- Built and launched an agentic AI system automating calls, scheduling, quoting, and shop operations end-to-end. Reached ~\$12K ARR with paying customers, processed 5,000+ interactions and recovered \$9K+ revenue in first 2 months
- Architected the AI orchestration layer for multi-step task execution across sales and operations

Scopic Legal [\$5M Valuation, Backed by Loyal VC]

Designation: CTO

Ontario, CANADA

2025 - 2026

- Built and scaled an **AI-powered legal platform** enabling automated legal research, document drafting, and workflow automation for modern legal teams, with human-in-the-loop support.

ZAZ LABS

Designation: Co-founder

Chico CA, USA

2025 - 2026

- Led applied AI projects with traction across legal AI, multimodal agents, and memory infrastructure; delivered SaaS revenue (\$10K MRR) and showcased at major hackathons/conferences.
- AERO - Stanford University
Built a Manus-level multimodal AI agent powered by a self-developed (MCP) leveraging Gemini, Groq, and Deepgram, OpenAI, 11labs APIs to decompose user input into executable actions via symbolic reasoning, contextual memory, and perceptual grounding—enabling real-time control over local applications through text, voice, and vision

Center for Healthy Communities

Designation: Data Science intern.

Chico CA, USA

2025 - 2026

- Analyzed CalFresh participation and survey data to identify equity gaps in food assistance access.
- Built Power BI dashboards and Azure-based data pipelines to streamline reporting for public health projects.
- Translated technical findings into policy-relevant insights supporting food insecurity and outreach initiatives.

Infosys [Collaborated with UBS and Credit Suisse on Strategic Projects]

Designation: Data Engineer

Pune, India

2022 - 2024

Insta Award: Recognized for resolving **high-priority project issues**, improving **workflow efficiency by 30%**

- Developed and implemented machine learning models using Python (pandas, numpy, scikit-learn) to analyze large-scale structured datasets and generate actionable insights
- Processed and validated multi-source datasets, improving data quality and consistency through automated validation pipelines
- Built interactive dashboards using Power BI to communicate complex analytical findings to non-technical stakeholders
- Performed exploratory data analysis (EDA) and statistical modeling to identify trends and support data-driven decision making
- Worked with cloud-based environments (Microsoft Azure and Databricks) for data processing and model experimentation

Tata Motors

Designation: Engineer

Pune, India

2021 - 2022

- Programmed industrial robots using **KUKA (KRL)** and **FANUC (TP)** for automated manufacturing, integrating them with **PLC systems** to enable end-to-end production automation
- Led debugging, calibration, and commissioning of robotic cells while optimizing cycle times and improving system reliability, reducing downtime and manual intervention by ~20-25%

RESEARCH

- Researching multimodal foundation models, implementing and analyzing CLIP & BLIP to improve cross-modal embedding alignment and contrastive learning
- Adapting VLMs for image-text retrieval and visual reasoning, enhancing semantic understanding through model fine-tuning

SKILLS

- Leadership & Collaboration:** Team Management, Cross-functional Collaboration, Project Leadership.
- Programming and AI/ML:** Python, PyTorch, RAG, Vector Database, LLM's, R, SQL/NoSQL, Flask, Git, Unix, Databricks, TensorFlow, PyTorch, scikit-learn, Pandas, NumPy, NVIDIA Rapids, Reinforcement Learning, Hugging Face, Transformers, Generative AI, OpenCV, NLP, AZURE, AWS, GCP, Voice AI.
